

Get back to feeling like yourself. Naturally.

NEURO SERVICES HEALTH

Retrain your brain

When your brain or body are traumatized or damaged by the stress of every day life, your body is unable to function properly. *Concussions, migraines, fatigue, loss of balance and pain* are just some of the symptoms you may experience. Ultimately, you don't feel yourself and are unable to live your life to its fullest potential.

NeuroHealth Services helps patients regain their lives by discovering the underlying cause of their chronic pains, migraines and other neurological problems. There are times when medication and surgery are needed, but in a majority of cases, these can be avoided.

Often, our findings and therapies can provide insights to traditional medical care so they can be applied in a more targeted manner.

DRUGS AND SURGERY

DON'T HAVE TO BE YOUR FIRST OPTION

The medical route is traditionally what first comes to mind as you look for answers to your health problems. Medication is often prescribed to treat the symptoms you are experiencing. But what happens when the tests don't show a problem, or the medications you were prescribed don't work? For some, this has led to unwanted procedures or surgeries in order to alleviate the symptoms. Unfortunately, you are blamed that it's all in your head if the problem can't be found or fixed with traditional medical options. The reality is that there may not be an obvious medical cause, but rather inappropriate communication between your brain and body as the main culprit to your declining health.

NON-INVASIVE HEALING IS YOUR **BEST** CHOICE

The next generation of healthcare solutions are utilizing a more holistic and natural treatment methodology that has a sole focus is addressing the underlying cause. This approach is research-based, objective and leading the change in healthcare that many people are looking for.

NeuroHealth Services evaluates the entire person (brain, hormones, immune system, musculoskeletal injury) and determines the best way to get results in the shortest amount of time. Due to our unique integration of Functional Neurology and Functional Medicine, we are able to identify, and treat, the underlying problem at it's source. This allows us to give you the answers you've been looking for.

We focus on the bi-directional communication between your brain and body. The brain controls our body and our body provides feedback to the brain. When either end of the relationship breaks down, your health is soon to break down as well.

WHO WE HELP

Unfortunately, many of our patients come to us out of frustration with their current healthcare. The most common complaint is, "I'm so discouraged with the medical system. I'm frustrated because I've been to this doctor, this acupuncturist, this massage therapist, this chiropractor, but nothing is working and I don't know what else to do."

We're here to help correct a life-altering condition and give you results that are long lasting. Here is a sample list of conditions our patients come to us for:

- Concussions
- Migraines
- Dizziness/Vertigo
- Back/Neck pain
- Visual Disturbances / Double Vision
- Chronic Fatigue Syndrome
- Fibromyalgia
- Thyroid Disease
- Depression/Anxiety
- Brain Fog
- Neuropathy
- Sciatica

Please visit our web site (NeuroHealthServices.com) for a comprehensive list of conditions we treat.

DON'T LIVE ANOTHER DAY IN PAIN

If you are suffering from neural, back and chronic pain, please come see us. If you are frustrated with the lack of answers from your current healthcare options, we can bring clarity.

There is no need to be in pain and just having to "deal" with it. Call us to set up your private consultation and examination. We are committed to finding answers and start the healing process.
